

ERROR: Cannot write to ECI.INI

This typically occurs when trying to save data using the Answer Sheet Manager program

EXPLANATION:

This usually happens because the user does not have read/write access to the folder for Answer Sheet Manager.

SOLUTION/FIX:

Give yourself permissions to the Answer Sheet Manager folder.

If unable to do this, try installing Answer Sheet Manager in a folder you have no problem reading/writing to.

If you are unable to do this, ask your computer support organization for assistance.
